QUICK GUIDE

MAGNETIC REFLECTIVE LED CLIP LIGHT

12 × 4 cm clip, fluorescent green and reflective, with a red LED, that folds and clamps magnetically onto clothing, a bag or a belt to be seen at night. Setting up, modes, battery, safety.

REF. CLIPSLEDFLUO · 3 MODES: STEADY, SLOW FLASH, FAST FLASH · BUILT-IN BUTTON CELL, 10.5 G

How it is made

The clip folds in half. The outer face, fluorescent green, carries the on/off button and the red LED; the inner face, grey, houses the battery and the magnet. Folded over the edge of a fabric, it holds on by the magnet alone, with no pin or stitching.

Setting up

1. **Unfold the clip** flat. In the middle of the grey face, the button cell sits in a small holder.
2. **Pull out the insulating film** the clear tab sticking out of the holder: pull it gently until it comes free. The clip is ready.
3. **Position it** astride a fabric edge: sleeve, collar, bag strap, belt, leash. Fluorescent face outwards, LED facing the vehicles coming up behind you.
4. **Switch on** with one press of the button. Further presses cycle through the modes, then switch off.

The modes

Steady light	The most visible up close, for walking in town.
Slow flash	Catches the eye from afar while sparing the battery.
Fast flash	The most noticeable on a dark road or in fog.

Battery and care

- A dimming light or an uneven flash means the battery is running out. Wipe the clip with a damp cloth; do not immerse it or put it in the washing machine.
- Stored for several months, make sure it is switched off: a button pressed at the bottom of a bag drains the battery.

Specifications

Colour	**Fluorescent green**	Material	**PVC, reflective surface**
Dimensions	**12 × 4 cm**	Weight	**Approx. 10.5 g**
Power	**Built-in button cell**	Modes	**Steady, slow flash, fast flash**
Fixing	**Magnet, on fabric or webbing**	Weather	**Rain, damp, fog**

SAFETY

- The clip makes you visible, it does not light the road: on a bike or scooter, keep your legally required front and rear lights.
- Button cell: keep out of reach of children. A swallowed battery is a medical emergency.
- Magnet: keep it away from bank cards, and from pacemakers or implanted medical devices.
- Rain resistant, not waterproof: remove it before washing the garment.
- On a dog, fix it to the harness or collar, never to skin or fur.
