CYCLAMI 650 ML AERO BOTTLE AND CAGE

Streamlined 650 ml bottle in PP5 with a retractable silicone spout, supplied with its dedicated clip-retention cage. Fitting the cage, drinking on the move, temperatures, care and troubleshooting.

REF. CYCLAMIBOTTLEBCLK650 · 650 ML, FILL BELOW 70 °C · ABOUT 125 G, BOTTLE AND CAGE

01 · GETTING STARTED

CONTENTS, FITTING, FIRST RIDE

In the box

- The 650 ml aero bottle with its retractable silicone spout, black or grey depending on the model.
- The one-piece composite cage with clip retention, made for this bottle.
- A silicone dust cover, two mounting screws and an L-shaped hex key.

Fitting the cage

1. **Choose the position** on the down tube or seat tube, where the frame has two threaded bottle cage bosses. Remove the old cage if there is one.
2. **Offer up the cage** against the frame, bottom stop facing down, and start both screws by hand so as not to damage the threads.
3. **Tighten** with the key, one screw then the other, without forcing: overtightening damages the boss and the cage.
4. **Insert the bottle** from the top, spout closed, until the clip holds it. Pull gently: it must stay put without play.
5. **Check the clearance** the bottle must not touch a cable, another bottle or your legs as you pedal.

Specifications

Capacity	**650 ml**	Dimensions	**≈ 90 × 70 × 245 mm**
Bottle	**Polypropylene PP5, BPA free**	Spout	**Silicone, retractable**
Cage	**Composite, one-piece, clip**	Filling	**Liquid below 70 °C**
Bottle weight	**≈ 85 ± 5 g**	Cage weight	**≈ 40 ± 5 g**
Total weight	**≈ 125 ± 5 g**		

ON THE ROAD

- Drink on a straight, clear stretch, one hand on the bar, eyes on the road.
- Check the screws now and then: a loose cage can drop the bottle onto the road.
- Never pour in liquid at 70 °C or above: the bottle deforms and the liquid can scald.

02 · DAY TO DAY

DRINKING, CARE, TROUBLESHOOTING

Drinking on the move

Open	Take the bottle out of the cage, pull the silicone spout up.
Drink	Squeeze the bottle: the harder you squeeze, the faster the flow. No need to tilt the bottle far.
Close	Push the spout back to the closed position, then return the bottle until the clip holds it.
Dust cover	Fit the dust cover over the spout on dusty or muddy tracks and when carrying the bottle.

Temperatures and uses

USE	RECOMMENDATION
Water, cold drinks	Suitable
Warm liquid	Suitable below 70 °C
Boiling water	Not recommended
Microwave	Do not use

Cleaning and care

- Rinse the bottle after every ride, especially after a sugary or sports drink.
- Wash it by hand with water and washing-up liquid. Remove the spout to clean it separately.
- Dishwasher use is accepted: choose a low-temperature programme. Never boil it or sterilise it at high temperature.
- Let all parts dry, open, before closing and storing the bottle.

The silicone spout and its tethered dust cover.

If something goes wrong

SYMPTOM	FIX
Bottle leaks when carried	Push the spout to the closed position; after washing, check it is properly refitted.
Bottle moves in the cage	Push it in until the clip holds, tighten the cage screws.
A round bottle does not fit	The cage is made for this streamlined bottle and does not take a standard bottle.
Taste or smell	Wash with the spout removed, let it dry open.
Bottle deformed	Liquid too hot: stay below 70 °C.
