QUICK GUIDE

DAREVIE VENTILATED CYCLING CAP

Thin polyester mesh cap, worn under a bike helmet or on its own. Putting it on, peak position, precautions and care.

REF. DAREVCASBLCK1 · 2-POSITION PEAK, ELASTIC BACK · 100% POLYESTER, MESH

What the cap does

The polyester mesh lets air through and limits heat build-up during effort. The inner band, running all round, holds back sweat and raindrops before they reach your eyes. Its thin profile fits under a bike helmet.

Putting it on

1. **Turn the cap the right way** peak at the front, elastic band at the back, on the nape of your neck.
2. **Pull it on** from front to back, inner band lying flat on your forehead. The elastic sets the fit, no other adjustment needed.
3. **Set the peak** down against sun and light spray from rain, up for a wider field of view.
4. **Put on your helmet** over the cap, then adjust it as usual: retention system and chin strap fitted.
5. **Check** while stationary: no folds under the helmet, and the peak does not hide the road in your riding position.

Specifications

Material	**100% polyester**	Fabric	**Lightweight mesh**
Construction	**4 panels**	Fit	**Elastic back band**
Peak	**2 positions**	Headband	**All round**
Colour	**Black and white**	Contents	**1 cap**

Care

- Gentle wash, with similar colours.
- No harsh bleaching products.
- Dry in the open air. No tumble dryer: it damages the elastic and the shape of the cap.

Front view: peak and inner band running all round.

ON THE BIKE

- The cap goes under your helmet, never instead of it: it offers no impact protection.
- Your helmet must stay properly fitted: cap lying flat, no thick fold underneath.
- With the peak down, check it does not cut your view ahead.

IF SOMETHING GOES WRONG

- Helmet shifts or presses: loosen it, flatten the cap, tighten again.
- Peak in the way under the helmet: flip it up.
