QUICK GUIDE

DAREVIE VENTED CYCLING CAP

Four-panel polyester mesh cap, worn on its own or under a bike helmet. An inner band holds back sweat and a rear elastic band adjusts the fit. Wearing, peak position and care.

REF. DAREVCASWHI1 · 2-POSITION PEAK, REAR ELASTIC BAND · 100 % POLYESTER, BREATHABLE MESH

Wearing it under a helmet

1. **Put the cap on** with the peak facing forward, the inner band flat against your forehead and the elastic band at the back of your neck.
2. **Centre it** by lining up the black stripe with your forehead and neck. The inner band must not crease.
3. **Set the peak** down against sun and light spray from rain, up to open your field of view.
4. **Fit the helmet** on top, in its usual place on your forehead. If needed, adjust the head size and chin strap again.
5. **Check** once the helmet is fastened: shake your head, it must not slip or tilt. The peak must not hide the road.

The rear elastic band adjusts the fit, with no fastener.

Specifications

Material	**100 % polyester**	Fabric	**Lightweight mesh**
Construction	**4 panels**	Peak	**2 positions**
Fit	**Rear elastic band**	Inner band	**Sweat-absorbing, all the way round**
Colour	**White and black**		

Care

- Wash gently, with similar colours.
- No harsh bleaching products.
- Air dry. No tumble dryer: it damages the elastic and the shape.

ON THE ROAD

- The cap gives no protection in a fall: on the bike, wear it under a helmet, never instead of one.
- A helmet that moves on the cap protects less well: tighten it until it holds firmly.
- With the peak down, keep the road and traffic lights in view.
