FITTING GUIDE

NEOPRENE CAR SEAT COVER

Universal 142 × 52 cm neoprene cover that caps the headrest and covers the backrest and seat: sweat, moisture, stains and pet hair stay on the cover. Fitting, care and precautions on one page.

REF. H2 · CAR SEATS, UNIVERSAL DESIGN · BLACK NEOPRENE, 142 × 52 CM, MACHINE WASHABLE

Before fitting

The cover fits without tools: a cap goes over the headrest, the rest runs down the backrest and seat, and its non-slip face keeps it in place. It is made for the drive home from the gym, the pool, the beach or a walk with the dog: damp clothes, sand, hair.

Fitting the cover

1. **Unfold the cover** and find the headrest cap, with its two notches for the posts.
2. **Cap the headrest** then run the cover down the backrest, smoothing it as you go.
3. **Spread the seat section** to the front edge of the seat, with no folds under the thighs.
4. **Pass the strap behind the backrest** and clip the buckle without pulling it too tight: it stops the cover riding up.
5. **Check before driving** that the seat belt, its buckle and the seat controls are free, then sit down: the cover must not slide.

Care

- Machine washable: delicate cycle, no tumble dryer, neoprene does not like heat.
- Let it dry completely before storing or refitting it: put away damp, it holds odours.
- After the beach, a rinse in clean water is often enough: salt and sand come off before they scratch the seat.

Headrest cap at the top, then backrest and seat: 142 × 52 cm laid flat.

IN THE CAR

- The cover must never get in the way of a seat belt: strap and buckle stay accessible, nothing goes over them.
- Seat with a side airbag built into the backrest: the cover must not cover the side it deploys from.
- Never under a child seat: its anchors and belt must bear directly on the car seat.

GOOD TO KNOW

- The cover helps keep sweat and moisture off the seat; wring out soaked clothes before sitting down.
