QUICK GUIDE

HIGH-VISIBILITY REFLECTIVE HARNESS

Elastic harness with reflective strips, worn over your clothes for cycling, running, walking or scooting, adult or child. Putting on, adjusting, safety rules and care on one page.

REF. HARN11 · ADJUSTABLE S TO XL, 120 G · 4 CM REFLECTIVE STRIPS

What the harness does

The grey strips bounce headlight beams back to their source: a driver whose lights hit you sees you from further away. With no light falling on them, they do not glow. The harness is worn as the outer layer, straps crossed at the back, belt fastened at the front. Its stretch straps adjust for an adult or a child.

Putting on and adjusting

1. **Open the front buckle** by pressing both sides, then pass the straps over your shoulders, crossed at the back, reflective strips facing forward.
2. **Close the buckle** at the front until it clicks. Pull gently: it must hold.
3. **Adjust the belt** by sliding the two keepers on either side of the buckle. The harness should stay put without squeezing: the elastic does the rest.
4. **Adjust the shoulder straps** at the shoulder keepers, same length on both sides. They should neither gape nor cut into the neck. For a child, do the adjustment yourself.
5. **Check before you go** that nothing covers the strips: backpack, open jacket, scarf. Wear the harness over your last layer, jacket included.

CARE

- Hand wash, lukewarm water, mild detergent. No bleach, no tumble dryer, no iron on the reflective strips.
- Dry in the open air, flat, away from a radiator.
- Check the strips and buckles regularly: a scratched or dull strip reflects less light.

Specifications

Colour	**Fluorescent green**	Size	**S to XL, adjustable**
Strips	**4 cm, reflective**	Material	**Elastic**
Fastening	**Front buckle**	Weight	**120 g**
Visibility	**300 m stated**		

ON THE ROAD

- The harness gives off no light: it replaces neither your bike lights nor the vest required by local regulations. It adds to them.
- It is not certified protective equipment: do not rely on it where a vest meeting a standard is required.
- At night and in grey weather, keep your lights on: the strips only work for whoever is lighting you.

GOOD TO KNOW

- Only the grey strip reflects. The fabric colour helps by day, not at night.
- Under a backpack, the crossed straps on your back are hidden: add a reflective backpack cover or a rear light.
