FITTING GUIDE

YELLOW REFLECTIVE RAIN COVER FOR BACKPACKS

Waterproof polyester cover that caps your backpack against rain, snow and dust, with a reflective strip on the back. Choosing the size, fitting, safety rules and care on one page.

REF. HOSACJAUN15-25L · FIVE SIZES, FROM 15-25 L TO 65-75 L · YELLOW WATERPROOF POLYESTER, REFLECTIVE STRIP

Before you start

The cover stretches over the pack with its elastic hem: it covers the outer face, sides and base; shoulder straps and back panel stay outside. Pick the size from your pack's volume, printed on its label or in its manual: too small and it pops off at the first bump, too big and it bags and holds water. The grey strip bounces headlight beams back to their source: a driver whose lights hit you sees you from further away.

Fitting the cover

1. **Close the pack** and tuck in any dangling straps: they would run under the cover and let water in.
2. **Cap the base of the pack** with the cover, reflective strip facing out and towards the bottom of the pack, road side.
3. **Pull the elastic hem up** over the sides then the top, until it sits behind the shoulder straps. The hem must pass under the straps, against the back panel.
4. **Tension the cover** so the reflective strip lies flat and shows clearly from behind, with no fold hiding it.
5. **Check before you go** by tugging on the cover: it must not come off. A hem that rides up means the size is too small.

CARE

- After rain, unfold the cover and let it air dry before storing: folded damp, it mildews and smells.
- Hand wash, lukewarm water, mild soap, without scrubbing the reflective strip. No bleach, no tumble dryer, no iron.

Specifications

Material	**Waterproof polyester**	Colour	**Yellow**
Protects from	**Rain, snow, dust**	Visibility	**Reflective strip**
Sizes	**15-25 to 65-75 L**	Fixing	**Elastic hem**

ON THE ROAD

- The strip gives off no light: it replaces neither your bike lights nor the vest required by local regulations. It adds to them.
- The cover hides whatever was reflective on the pack itself: check a rear light stays visible, or fix it to the cover or the saddle.

GOOD TO KNOW

- The cover protects the pack, not its contents from immersion: water can get in on the back-panel side. Electronics in a waterproof pouch.
- Yellow shows up by day; at night, only the grey strip reflects light.
