FITTING GUIDE

# SILICONE DISPLAY COVER FOR XIAOMI SCOOTERS

Soft silicone cover that wraps the dashboard of Xiaomi M365, M365 Pro, 1S, Essential and Pro 2 scooters, against rain, dust and scratches, without hindering the display or the button. Fitting and care on one page.

**REF. HOUSXIAOBLCK** · XIAOMI M365, PRO, 1S, ESSENTIAL, PRO 2 · SILICONE, 14 × 4 CM

## Before fitting

The cover measures 14 × 4 cm and hugs the dashboard on the stem: a clear window for the display, a raised bump for the power button. It is waterproof against rain and dust and protects the display from knocks and scratches. It is held by two double-sided adhesive strips and a retaining elastic, supplied. Fit it in the dry, on a clean display at room temperature: the adhesive does not stick to a cold or damp surface.

## Fitting the cover

1. **Clean the dashboard** and the top of the stem with a slightly damp cloth, then dry. No dust or fingerprints.
2. **Stick the adhesive strips** to the inner edges of the cover, along the long sides, then peel off their backing film.
3. **Position the cover** window over the display and bump over the button, then press the edges for a few seconds.
4. **Fit the elastic** around the stem, over the top of the cover, and adjust it so it holds the cover flat without distorting it.
5. **Check** that the display reads clearly, that the button responds through the silicone and that no edge gapes: water would get in there.

## Care

- Clean the silicone with soapy water and dry it; a dulled window brightens up with a soft cloth.
- After heavy rain, lift the cover and dry the display if condensation has formed.

## Specifications

| | | | |
|---|---|---|---|
| Dimensions | **14 × 4 cm** | Material | **Soft silicone** |
| Waterproofing | **Rain, dust** | Fixing | **Adhesives, elastic** |
| Window | **Clear** | Contents | **Cover, adhesives, elastic** |

*In the rain, the display stays readable through the window.*

**GOOD TO KNOW**

- Waterproof against rain and splashes, not immersion or a pressure washer: clean the scooter with a cloth.
- The cover comes off by hand; the adhesive strips work once: when refitting, replace them with thin double-sided tape.
