QUICK GUIDE

RETRACTABLE KEYCHAIN CARABINER WITH STEEL CABLE

Spring-gate carabiner that clips to a belt or bag, linked to a key ring by a 60 cm steel cable that winds itself back in: keys or badge are used without unclipping. Use, precautions and care on one page.

REF. MOUSQBLCK1 · KEYS, BADGES, TOOLS, FISHING ACCESSORIES · STEEL CABLE 60 CM, 25 G

Before you start

Three parts: the aluminium carabiner with its spring gate, the housing that holds the reel and its return spring, and the key ring on a swivel that turns freely. The steel cable comes out of the bottom of the housing and winds back in as soon as you stop pulling.

Setting up

1. **Clip the carabiner** to a belt loop, a bag strap or a ring: open the gate with your thumb, hook it on, let the gate close. Pull: it holds.
2. **Fit your keys** on the split ring: lift the end of the ring with a fingernail or a coin, slide the key in and turn it until it sits in the middle.
3. **Pull to use** keys to the lock, badge to the reader: the cable pays out up to 60 cm. Do not pull past the stop.
4. **Guide it back** keeping your hand on the keys until they reach the housing. Let go suddenly and the bunch whips back and can hit a hand or a face.
5. **Check now and then** the gate must close on its own and firmly; the cable must show no kink or broken strand; the swivel must turn without catching.

Care

- Wipe the cable after rain or sea water and let it dry unwound to avoid rust.
- A frayed cable, a spring that no longer pulls back or a gate that no longer closes: replace the carabiner.

Specifications

Size	**4 × 12.5 cm**	Weight	**About 25 g**
Cable	**Steel, 60 cm**	Housing	**Reinforced plastic**
Carabiner	**Aluminium**	Contents	**1 piece**

On a backpack strap: keys stay within reach.

NOT SAFETY EQUIPMENT

- This carabiner is not designed for climbing, belaying or holding a person or an animal: it carries keys and small accessories, nothing more.
- The taut cable can cut or burn the skin: never wrap it round a finger, keep it away from children.
- No heavy items and no sharp tugs: the spring and the cable are not made for that.
