QUICK GUIDE

HARD CASE FOR BONE CONDUCTION HEADPHONES

Rigid EVA shell with a PU coating, velvet interior with a moulded compartment for the headband and a mesh pocket for the charging cable. Storage, carrying and care on one page.

REF. SACSHOKZBLCK · BONE CONDUCTION HEADBANDS, 16 × 12.5 CM · EVA SHELL, PU COATING, WRIST STRAP

Before packing

The case takes a bone conduction headband laid flat in its moulded compartment, with the charging cable in the mesh pocket of the lid. Headphones are not included. It measures 16 × 12.5 cm overall: a headband that does not sit in it without forcing is not meant for it.

Packing and carrying

1. **Open the zip** fully and fold the lid flat: the two halves are joined by a fabric hinge.
2. **Lay the headband** around the central ridge, arms on either side, without twisting or spreading it: it should follow the shape with no spring tension.
3. **Slip the charging cable** loosely coiled into the mesh pocket of the lid, connector upwards so you can find it without digging.
4. **Close** holding the lid with one hand: nothing should stick out or get caught in the zip teeth.
5. **Clip the wrist strap** to your wrist, a bag handle or a carabiner. In a sports bag, put the case on top of the heavy items.

Care

- Outside: damp cloth, then dry. No solvent or alcohol on the PU coating.
- Inside: dry cloth or soft brush on the velvet. After rain, leave the case open until fully dry.
- Do not put anything heavy on it or leave it in the sun behind glass: the EVA shell deforms with heat.

Moulded compartment for the headband, mesh pocket in the lid, wrist strap on the side.

Specifications

For	**Bone conduction**	Dimensions	**16 × 12.5 cm**
Shell	**Rigid EVA**	Coating	**PU, water-resistant**
Interior	**Velvet, mesh pocket**	Protection	**Knocks, moisture**
Carrying	**Wrist strap**	Contents	**1 case**

GOOD TO KNOW

- Fits Shokz OpenRun, AfterShokz Aeropex, Trekz Air and Titanium Mini, Haylou Purfree and headbands from other brands of a similar size.
- The PU coating resists water and moisture: it protects from a shower or a damp bag, not from immersion. The zip lets water through if the case gets soaked.
- Never pack wet or sweaty headphones: wipe them first, trapped moisture damages the charging contacts.
